§46.203 Duties of IRBs in connection with research involving pregnant women, fetuses, and neonates.

In addition to other responsibilities assigned to IRBs under this part, each IRB shall review research covered by this subpart and approve only research which satisfies the conditions of all applicable sections of this subpart and the other subparts of this part.

§46.204 Research involving pregnant women or fetuses.

Pregnant women or fetuses may be involved in research if all of the following conditions are met:

- (a) Where scientifically appropriate, preclinical studies, including studies on pregnant animals, and clinical studies, including studies on nonpregnant women, have been conducted and provide data for assessing potential risks to pregnant women and fetuses;
- (b) The risk to the fetus is caused solely by interventions or procedures that hold out the prospect of dire ct benefit for the woman or the fetus; or, if there is no such prospect of benefit, the risk to the fetus is not greater than minimal and the purpos(st)-3.3g ()]TJ -2.2erold ou

(2) Each individual providing consent under painformed regarding the reasonably foreseeable	(c)(5) of this section is fully nate.					
(3) Individuals engaged in the research will have no part in determining the viability of a neonate.						
(4) The requirements of paragraph (b)	or (c) of this section have been r	net as applicable.				
(b) Neonates of uncertain viability. a neonate may not be involved in research co conditions have been met:	Until it has been ascertained whether vered by this subpart unless the follo	,				
(1) The IRB determines that:						

(1) Where scientifically appropriate, preclinical and clinical studies have been conducted and

provide data for assessing potential risks to neonates.

- (i) The research holds out the prospect of enhancing the probability of survival of the neonate to the point of viability, and any risk is the least possible for achieving that objective, or
- (ii) The pu rpose of the research is the development of important biomedical knowledge which cannot be obtained by other means and there will be no added risk to the neonate resulting from the research; and
- (2) The legally effective informed c (2)7. Tw 0 -1.7 (g t)-3c (n)-0. Tw 0 -(o)10 ((ve)13. .7 (d Tc 0.002 e)-8.6 (v)-9.6 (se)-8.7 (a)-4.)ti7 (a)-4.
